The campaign was started by a speech delivered by the chairman of the Students' Union. Following that, it was time for the members of various clubs to show off their talents in unique and creative ways, such as a dancing, poem recitation, painting and so on. Just as I was at a loss, I was informed that my schoolbag was at the school's Lost and Found and it was you who had found my schoolbag. My excitement was truly beyond description at that moment!

Please accept my cordial/heartfelt thanks for your help.

Yours,

Li Hua

Some support the creative measures, saying that the use of high technology can add beauty to the Palace Museum, and thus making it more attractive to visitors. However, those who are against the idea say that it will destroy the original appearance of the Palace Museum. More importantly, it is extremely essential to respect the history and our tradition and culture.

In my opinion, lots of work can be done to appeal to more visitors. It's our duty to provide a complete and true ancient palace for the world.

A Fantastic Trip

This summer I took a scuba diving trip to the undersea world, which turned out to be extremely fantastic.

The first thing I became aware of was all the vivid colors surrounding me—purple, red, orange, yellow and blue. Seeing such extraordinary beauty, I found my heart beating wildly and every cell in my body waking up. I began to explore the fantastic coral around which all kinds of neat and elegant fish were swimming. Suddenly, I caught sight of an eel with its head showing from a hole watching for tasty food. I felt scared to death and fled away. But when I looked down into the depth of the ocean, I felt like discovering a whole new dimension of life.

Our Future Life

Good afternoon, boys and girls.

With the rapid development of high-tech, our life has changed a lot in the past decades. Many things that wouldn't happen before have come into reality. Therefore, our life will change as well in the future.

Perhaps some people will have the alternative to go to the moon for a holiday or live under the sea, which will make their life interesting and colorful. Besides, in the future maybe each family will rely on robots to do housework and we'll have more free time to develop our hobbies. What's more, all the materials can be recycled and nothing will be wasted. Our environment will be much better than now.

I believe life in the future must be wonderful and exciting, so I'll try my best to work hard for a better future life.

Thanks for listening!

As the twins looked around them in disappointment, their father appeared. Father's appearing was like a savior to the two children. Under the guidance of their father, they took positive actions and started

all over again. They made the bread and then went on cooking porridge. Father helped them adjust the fire, which was the key to success. It was all right this time. Delicious breakfast was ready. How happy they were!

The twins carried the breakfast upstairs and woke their mother up. When their mother saw the delicious and perfect breakfast in front of her, she was very surprised. It was not only the gift, but the love of the children for her that moved her very much. The two children could finish cooking a breakfast, which she didn't expect. The children said loudly, "Happy Mother's Day!" Mother hugged them tightly and kissed them again and again.
